100 LARGEST DEFENSE CONTRACTORS  
AND THEIR SUBSIDIARY CORPORATIONS  
FISCAL YEAR 1979

FOREWORD

This report presents summary data on Department of Defense military prime contracts awarded to the leading 100 companies and their subsidiary corporations during fiscal year 1979.

The data include debit and credit procurement actions over \$10,000, worldwide, under military supply, service, and construction contracts. Procurement actions include definitive contracts, the obligated portions of letter contracts, job orders, task orders, delivery orders, and any other orders against existing contracts. The data neither include that part of indefinite quantity contracts that have not been translated into specific orders on business firms, nor do they include purchase commitments on pending cancellations that have not yet become mutually binding agreements between the government and the company. The company totals do not include contracts made by other U.S. Government agencies and financed with Department of Defense funds, or contracts awarded in foreign nations through their respective governments.

The assignment of subsidiaries to parent companies is based on stock ownership of 50 percent or more by the parent company, as indicated by data published in standard industrial reference sources.

The company names and corporate structures are those in effect as of September 30, 1979, and for purposes of this report company names have been retained unless specific knowledge was available that a company has been merged into the parent or absorbed as a division with loss of company identity. Only those subsidiaries are shown for which procurement actions have been reported.

100 COMPANIES AND THEIR SUBSIDIARY CORPORATIONS  
LISTED ACCORDING TO NET VALUE OF MILITARY  
PRIME CONTRACT AWARDS

FISCAL YEAR 1979

Department of Defense military prime contract awards over \$10,000 for research and development, services, construction, and supplies and equipment awarded during fiscal year 1979 totaled \$63.3 billion, \$3.7 billion more than in fiscal year 1978. Large awards for aircraft, missile and space systems, electronics and communications, and ships, which are dominated by large contractors, resulted in \$42.0 billion or 66.4 percent of total procurement being awarded to these 100 companies which, together with their subsidiaries, received the largest dollar volume of prime contracts over \$10,000. In fiscal year 1978, the top 100 companies received \$40.8 billion or 68.5 percent of the volume of all awards.

The following table shows that the first five companies received 20.7 percent of the total received by all companies in fiscal year 1979, compared with 22.5 percent during fiscal year 1978. The largest company in fiscal year 1979 received awards totalling \$3.5 billion compared with \$4.2 billion for the largest company in fiscal year 1978. To get on the list in fiscal year 1979 required 76 million in awards, as opposed to \$61 million in fiscal year 1978.

Of the 82 companies appearing on the list in both fiscal year 1978 and 1979, 35 advanced their position, 36 are in a lower position, and 11 showed no change. Companies are considered as appearing on the list in both years despite mergers, acquisitions, divestitures, and name changes if a major component of a newly constituted company or the newly constituted company itself made the list as a component of a company in the top 100 in the prior year.

Although the contract work of many companies on the list include more than one procurement category, each company has been assigned in the following table to the procurement category that accounts for its largest dollar volume of defense awards; for example, International Telephone and Telegraph Corporation is a multi-industry company producing electronic and communications equipment and industrial and consumer products. For this table, it is assigned to "Electronics," the procurement category accounting for its largest dollar volume of DoD contract

awards. On this basis, companies producing "aircraft" and "construction" each increased by three, "ships" increased by two, while "petroleum" decreased by three.
